Professional Summary

Full Stack Developer and final-year B.Tech student at **ABV-IIITM Gwalior** with internship experience shipping scalable web applications across the **React** and **Next.js** ecosystem, backed by **Node.js** and **Express.js**. Proficient in **RESTful API design**, **component-driven UI architecture**, and **relational data modeling** with **PostgreSQL** and **Prisma ORM**, with hands-on experience integrating **Generative AI** — **LLM APIs**, **RAG pipelines**, and **streaming AI interfaces** — into production-grade products.

Experience

Techronyx Solutions Pvt. Ltd.

Full Stack Developer Intern

Pune, India

Aug 2025 – Nov 2025

- **Component Architecture:** Architected reusable, composable React.js component libraries enforcing atomic design principles, strict separation of presentation and logic layers, and consistent prop-contract interfaces across production modules.
- **Performance Optimization:** Applied memoization, code splitting, lazy loading with dynamic imports, and virtual DOM reconciliation tuning to eliminate redundant re-render cycles and reduce bundle size.
- **Responsive UI & Accessibility:** Built responsive, mobile-first layouts with Tailwind CSS and semantic, WCAG-aligned accessible components ensuring a consistent UX across devices and screen sizes.
- **Backend & APIs:** Designed scalable RESTful API endpoints in Node.js and Express.js with middleware pipelines covering authentication guards, input sanitization, and structured error handling.
- **State & Data Fetching:** Managed client and server state with Redux Toolkit and React Query — implementing optimistic updates, cache invalidation, and background refetching to keep UI in sync.
- **Quality & CI/CD:** Contributed to peer code reviews and iterative CI/CD workflows enforcing clean architecture standards and ensuring regression-free, stable production releases.
- **Production Debugging:** Diagnosed and resolved critical production defects by tracing full request-response lifecycles across frontend, middleware, and database layers under tight delivery constraints.

Technical Skills

Languages	JavaScript (ES6+), TypeScript, C++, SQL, HTML5, CSS3
Frontend	React.js, Next.js (App Router / SSR / SSG), Redux Toolkit, Tailwind CSS, shadcn/ui
Backend	Node.js, Express.js, REST API Design, Prisma ORM, Convex, Clerk Auth, JWT
AI / GenAI	LangChain, RAG Pipelines, Prompt Engineering, OpenAI / Gemini / Claude, Embeddings, Pinecone
Databases & Tools	PostgreSQL, MongoDB, Git, GitHub, Docker, Vercel, CI/CD, VS Code
Coursework	Data Structures & Algorithms, DBMS, Operating Systems, OOP, Computer Networks, Web Technologies

Projects

Creatr: AI Content Platform | Live | GitHub

Next.js · Convex · Clerk Auth · LLM APIs · TailwindCSS

- Engineered a full-stack **Generative AI** content platform on **Next.js App Router** integrating **LLM APIs** for AI-driven text/media generation with **streaming responses (SSE)**, prompt templating, and token-aware request handling for a responsive authoring experience.
- Implemented **OAuth** authentication and session management via **Clerk**, and built event-driven analytics pipelines on the **Convex** backend delivering real-time content insights with live state propagation across clients.

ViewVault: Entertainment Dashboard | Live | GitHub

React.js · Redux Toolkit · TMDB REST API · JavaScript (ES6+)

- Engineered a responsive, **high-performance** movie discovery platform with **infinite scroll pagination**, multi-parameter advanced filters, and **real-time TMDB REST API integration** — delivering a seamless, API-driven content browsing experience at scale.
- Architected **Redux Toolkit** state slices with **memoized selectors** and normalized store structure, eliminating redundant re-render cycles and achieving a **40% improvement in UI rendering performance**.

FinSight: Personal Finance Tracker | Live | GitHub

Next.js · Node.js · Prisma ORM · PostgreSQL

- Developed a full-stack personal finance system with **CRUD operations**, budget enforcement logic, and validated data flows ensuring record consistency.
- Designed **normalized PostgreSQL schemas** with **Prisma ORM**, enabling reliable transaction tracking and analytics reporting.

Education

7.54/10 Bachelor of Technology, Electrical and Electronics Engineering, ABV-IIITM Gwalior | Gwalior, India **2023 – 2027**

90% Class XII (PCM), MSS Public School | Gwalior, India

2021 – 2022

Positions of Responsibility

- **Technical Head, Rotaract Club** — Led full-stack web development initiatives and delivered technical workshops on modern JavaScript frameworks and deployment pipelines for club-wide events.
- **Media Cell Head, EEE Department** — Drove cross-platform digital content strategy and automated outreach workflows, expanding the department's online presence and community engagement.

Achievements

- **Semi-Finalist, Smart India Hackathon 2025** — Delivered a production-ready full-stack web solution for a real-world government problem statement among top national teams.
- **Quarter-Finalist, Amazon ML Challenge 2025** — Advanced through competitive elimination rounds applying data-driven problem-solving under time-constrained conditions.
